Subject: Turning Leaf

Hi Amanda,

On the Turning Leaf development.....

1. Where does the project stand for upgrades to the traffic lights and intersection at River and 302? Left turns onto to turning leaf from the westbound side of the intersection are not pleasant.
2. Additionally, I'm curious if a no left off Drive In lane onto 302 is a consideration. 302 between River Rd and Brookhaven has become the next traffic challenge and certainly an area of concern from my perspective.
3. With the water main extension that should cover water supply
4. Building D and E we need to discussion for access, it looks like we will only have apparatus access on the parking lot side and as always with the parking, sidewalk and setback it will be tough to access the roof and for only one side.

Thanks,

Brent
