Ron and Barbara

Thank you for your feedback, and soon we will be putting together an adhoc committee to make recommendations once final funding is approved (which should be in the next 60 days). Thanks again. Look for the formation of this committee as we will be looking for volunteers thru the standard process where the public notice to all residents will be posted on an upcoming council agenda.

Best,
Mark

Mark,
My wife Barbara and I live across the street from the proposed Park.
We support the concept of turning this lot into a park for the use of residents in the greater area of the high density of the housing neighborhoods.

Our primary concern is that it needs off street parking probably on Misty Drive. This street has more visibility and more road frontage. It should be obvious to all that with narrow streets on curved lots parking will be a problem.

Without off street parking and no curbs on either side of the streets cars will be parking on the grass in front of houses which we will strongly object to this situation.

We and most neighbors take pride in their property so, we urge the committee to develop a park that is not just for the two adjoining developments but for all the area that the grant stated and provide off street parking.
Thanks for reaching out with your letter,
Ron Boes
