You don't usually receive emails from this address. Make sure you trust this sender before taking any actions.

Life long Windham resident here who has been quiet for WAY too long! This growth we are experiencing is absurd! Please know that, along with my entire family, who are also all lifelong Windham residents, are vehemently against this 140+ unit development. We want your data. We want to see your calculations of how many cars and drivers and walkers are going to be coming in and out of this intersection daily and adding to our tight driving conditions. We want your figures of how many children this development is going to add to our already taxed schools. We want your computations of how this will effect crime and the already short staffed public enforcement, as well as public works. I've been watching this growth nonsense for too long and wish I'd spoken up sooner, I suppose I was expecting someone in a town role to come to their senses! We are not a city. And we don't want to be!

Enough is enough!
