To whom it may concern

As a property owner adjacent to this proposed development, we are strongly opposed to any of the waivers being considered for this project. We demand studies on wildlife impact, well water impact, septic systems, any drainage, traffic studies, noise, visual, impact on the waterways ie: Inkhorn, Colleybrook, and ANY OTHER areas that may be affected. We chose this area because of being zoned as farmland and a more rural area than our previous location off 302. We urge you to take the concerns of our community into consideration and reconsider any action on granting waivers. This could well be opening Pandora's Box and creating more problems than we can envision! Please!!! Reconsider the impact your decisions will have!

Thank you
