Hello,

As a long term resident of Windham, I am concerned about the new subdivision that is planned to be built. Not only does Maine not need more developments, as there are several built in the last few years that no one can afford, but to build it right across from a beloved farm is outrageous. Especially because Highland Cliff LLC wants to totally BYPASS impact reports- as if it knows it will not pass. Why must this development be rushed, before determining the impact on the enviroment, especially being across the street from an organic farm. I emlore you to reconsider proceeding with this development, at least until impact reports can be done.

A concerned citizen,  
Damara Stratis
