Windham Town Council
Windham, Maine 04062

Gentlemen,

I would like to ask for signage on Route 202 (Gray Road, Windham, Maine) in the vicinity of Roberts Drive to the Rotary at the Junction of Rts 302/202 specifically for signs stating "NO JACQUES BRAKES".

I realize we have a short construction season in Maine, but as of late, many of these heavy trucks laden with materials for road construction and other matters are travelling Eastward on the Gray Road from Windham Center towards the Rotary at speeds a little beyond the 35 MPH posted speed limit, and as they are approaching the Rotary and having to slow down, are using their engines as a hold back feature to enable them to navigate the Rotary, thereby causing an extreme amount of unnecessary noise, instead of using their designed braking system.

I realize also that it would be next to impossible to police the area to warn those drivers that perhaps cannot read or don't take signs for the reason they are put there for, but it would be a huge benefit for the people living in the area to reduce some of that noise.

Respectfully requested,

Ken Brann
