Hi Steve,

Based on my review, the 6/3/24 final Site and Subdivision Application submitted by Gorrill Palmer for the Windham Village Apartments adequately addresses my 4/11/24 comments on the preliminary plans and application. The only other comment that I have, which I had passed directly to Gorrill Palmer (see below) relates to the offset water main extension on Basin Road. As stated below, it appears as if the location of the end of public portion of Basin road is shown incorrectly on Plan Sheet C-202 for this project. The Applicants surveyor should complete further review and update the plans accordingly,

Thanks,

Mark

Hi Mark – Steve sent along this info previously as well. I've been working with Owen Haskell on getting this laid out for us, so that we can update the plans accordingly. Given timeline, I wanted to submit our package for final approval. I can provide an updated sheet once I get the info from Owen Haskell.

Hope this helps, let me know if you want to discuss more.

Hi Drew,

I think the location of the end of public portion of Basin road is shown incorrectly on Plan Sheet C-202 for this project. Where did you get that location. Its kind of an issue because there is a resident on Basin Road that is concerned about the amount of frontage he has on a public road. I think he's a little over-concerned, but
