**Re: Sketch Major Subdivision Plan Application
Webb Road Retirement Community
Robie Holdings, LLC - Applicant**

Dear Steve:

On behalf of Robie Holdings, LLC we have prepared the enclosed Major Subdivision Sketch Plan Application for review of a proposed residential condominium development on a 23-acre property located at the corner of Webb Road and Read Road. The development parcel currently consists of two parcels that were divided from the 15 Read Road property which is identified as lot 32-C on Tax Map 6. The applicant is proposing to reconfigure the two vacant parcels so that a 2-acre parcel will have access and frontage on Read Road and will be developed with a single-family home, and the remaining 21-acre property will be developed as a Retirement Community. At this time, we anticipate that approximately 60 homes will be constructed within the Retirement Community, but the total unit number will be based on several factors including site grading and wastewater disposal capability. The individual dwellings are intended to be sold as condominium units, and each unit will be accessed from a common private access drive approximately 2,500 feet in total length that will be constructed to meet the Town's standards for a Major Private Street including curbing and sidewalks.

The public water main located in Gray Road will be extended approximately 1,000 feet within the Webb Road public right-of-way to provide public water service to the project. All dwellings will be served by public water from the new main extension, and we will install fire hydrants at the two project entrances. We will work with the Town and PWD to determine other locations where fire hydrants may be needed. Power will be extended to the new dwelling units underground from existing overhead lines on Webb Road. We anticipate that one large leach field and up to 5 smaller leach fields will be installed to serve the new dwelling units with on-site wastewater disposal.

Drainage from the project site is tributary to Black Brook. We anticipate that the site impervious area will exceed 3 acres and that a Site Location Permit will be required from the Maine DEP. We are hopeful that the Town receives approval on its request for Delegated Review Authority and that the Site Law permit would be reviewed by the Planning Board. Wetland impact is expected to be minimal.

We do not anticipate that the project will require any market studies, utility studies or traffic studies beyond normal consideration to satisfy the Land Use Ordinance performance standards

and requirements of the utility districts. We are not aware of any existing easements on the property.

Upon your review of the enclosed documents, please let us know if you have any questions or require any additional information.

Sincerely,

DM ROMA CONSULTING ENGINEERS

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Cumberland County and Part of Oxford County, Maine

Survey Area Data: Version 21, Aug 26, 2024

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jul 22, 2021—Oct 7, 2021

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.
