As a resident of Windham Center and a life long resident of Windham I believe another subdivision is not in our best interest especially this close to the school the roads are already very busy with commercial traffic commuters and busses. The area they're looking to develop has long been part of the beautiful preserve that everyone has fought to keep that way. The increase in population is not going to help our town which has grown exponentially in the last years with many of these developments/subdivisions popping up all over town while taxes still continue to increase. I believe we need to slow growth limit permits and keep our small town charm we don't need to be the next Portland.

Thanks Glenn Connell  
255 Windham Center rd.
