Sent from my I am writing to you to express my concerns about the proposal for a 5-lot subdivision on Frost Lane. It was my understanding that construction on Highland Lake had been suspended for environmental reasons. This property is directly connected to the lake. The property has from my understanding a large amount of wetlands as well as a large amount of ledge which would require an extensive amount of blasting. The lots are small and will more than likely be close together which is also a concern. The town of Windham has exploded with new construction and feel that we should control growth in such a delicate land area. Please help to preserve this delicate area for wildlife and the lake's future. Respectfully Cindy Strumph
