Good day,

Unfortunately, I won't be able to attend tonight's meeting, but I wanted to share my thoughts regarding the proposal to demolish the barn and move forward with the condo development.

While I fully support growth and progress, I don't believe this area is the right place for such a project. If the planning board takes a step back and truly evaluates what's left in Windham for development, I think it will become clear that certain areas should be preserved to maintain the town's rural character.

The Rogers property—Don and Norma's land—is one of the few remaining spots that reflect the beauty and country feel that many of us value in Windham. Preserving this land is about more than resisting change; it's about protecting what makes our town unique and special.

Thank you for considering my perspective.

Fondly,

Julie Barker-Dudley
