Memo

To: Town Council
From: Barry Tibbetts, Town Manager
Re: Smith Cemetery

Last year in late October the Town received a proposal from Walsh Engineering Associates to review the adjacent parcel to Smith Cemetery for possible cemetery growth over the next 25-50 years. Don Gerrish had advised me of this study to be completed. In January I engaged Walsh Engineering to develop potential alternatives.

Current Town burial plots available amongst existing cemeteries is 468 single graves. The last few years indicate the Town has approximately 30 plots per year being completed. The Town's other existing cemeteries have no expansion opportunities.

Attached are a few options developed by Walsh Engineering Associates from the study.

How would Council like to proceed?

Establish a Cemetery Committee with a charge to:

- a. Review and make recommendations for this site
- b. Evaluate additional parcel locations
