

## Sign Program Current status

### **Welcome to Windham Signs**

After completing the Committee's work, the Welcome signs were presented to the Town Council and to a sign printer.

The Council suggested a couple of changes.

There was discussion about some details of the design.

There was concern that the School championship, and honors were no longer going to be displayed.

The sign printer was more critical of the design in that the purpose of the "Welcome to Windham" sign was being lost in the complicated design and many of the details would not be seen from the road driving at speed.

Roger has provided a simplified sign with larger text for design review.

The school championship and honors issue has not been resolved: If they would be displayed; how they would be displayed; for how long they would be displayed.

### **Wayfinding Signs**

After initial review of facilities to be identified and the number and locations of the wayfinding signs, it was determined to focus the effort on Welcome signs and facility location signs.

### **Funding**

Funding for the Welcome signs and facilities signs will need to be determined, as will final design.

### **Cemetery Signs**

Cemetery signs have been designed and bid. Production is to be scheduled.

### **Park Signs**

Park signs are being designed and have been bid. Production to be scheduled.

Will be simplified with larger text. (sample)
