

Windham's New Sewer System opens April 2026

Keep Our Sewer System Running Efficiently

Use Safer ingredients

Meets sustainable requirements

Performance Tested

Independently Certified

Look for these labels on
cleaning products

Your facility is connected to a **Bio-membrane sewer treatment plant**, which relies on delicate biological processes to treat wastewater. Harsh chemicals can disrupt these systems, leading to costly repairs and environmental harm.

Action Required:

Please check with your suppliers to ensure all cleaning products you use are **EPA Safer Choice, EcoLogo, or Green Seal certified**. These certifications guarantee products are formulated to minimize toxicity, reduce harmful residues, and protect water quality. By using certified products, you help maintain system efficiency and safeguard our community's environment.

Windham's New Sewer System opens April 2026

Small Choices, Big Impact

Use Safer ingredients

Meets sustainable requirements

Performance Tested

Independently Certified

Look for these labels on
cleaning products

Our town's sewer system uses **advanced bio-membrane technology**, which depends on healthy microorganisms to treat wastewater. Everyday cleaning products can harm these microbes and reduce system performance.

How You Can Help:

Choose greener products for your home—look for **EPA Safer Choice, EcoLogo, or Green Seal** labels. These products are safer for your family and the environment, and they help keep our treatment plant running smoothly. Your voluntary effort makes a big difference in protecting water quality and reducing pollution.
