

Proposed Amendment
Town of Windham: Solid Waste Ordinance

Chapter 192: Solid Waste

§ 192-3 Definitions and word usage.

COMMERCIAL SOLID WASTE

Acceptable waste generated by a commercial or industrial use or activity located within the Town, and acceptable waste generated by occupants of structures within the Town which contain more than ~~two~~ four dwelling units and which are occupied by more than ~~two~~ four household units. Except as provided above, commercial solid waste shall not include household or special wastes.

The purpose of this amendment to the definition of “commercial solid waste” is to bring the ordinance into compliance with the Town’s regular practice of collecting solid waste generated by occupants of residential structures with four or fewer dwelling units, and considering waste generated by structures with more than four dwelling units to be commercial solid waste, which is not collected by the Town.
