Provide a clear, concise description of the project

The scope of work for the project should be outlined. Depending on the nature of the project/activity include in your response: What will be built? What will be provided? Who will be served? Where will the project occur?

Install a bus shelter, benches, and solar powered sidewalk/pedestrian scale lighting on the 800-foot public portion of Anglers Road.

Anglers Road (public) defines an edge of Windham's 21st Century Downtown Planning Area as well as being the access for over 200 residences into the North Windham Commercial District so starting the pedestrian amenities as a pilot project here makes sense. This project will help connect the Anglers Road neighborhood to the new Downtown. The new Anglers Commons apartment complex currently under construction will have 42 market rate units with an internal sidewalk connection from Anglers Road (public) to the Donnabeth Lippman Park which will be available for public use. These same residents would have better access to public transit by adding a bus shelter just off of Route 302. This project is in an Area Wide Benefit eligible Census Tract for an Infrastructure Project.

This project will also serve as a pilot project for Windham's sustainability efforts by designing, installing, and monitoring the performance of solar powered pedestrian scale lighting.

Project Goal: ☐ Affordable Housing ☐ Public Facility Improvement ☒ Public Infrastructure Improvements
