

Windham Town Councilors,

I am very concerned that you are considering to take away the "Silver Bullets". Where they are located now are easy for me to get to. I have to use a walker to get around and cannot go down my driveway with the walker. I realize people are leaving all kinds of items they should not be doing. It's time this town took a little more interest in the elderly. Everything is for the young and able. If we could afford a multi-million Public Works garage (which wasn't necessary) then I think we can afford the silver bullets.

Years ago we had a "dump" at N.W. where people could take things that were not reusable could be left. After that closed the roadsides became littered with trash of all kinds. Folks seem to think we need to build more homes but are not doing anything to take care of the trash correctly. Everything is for the young folks, there are still some of the "old Windham" left. Thank you for heeding my concerns.
